287,431 children were identified in 2015-2016 with specific learning disabilities (SLD) in California, where they accounted for the largest of the 13 disability categories covered under special education law.

Children are often classified under the category of other health impairments (OHI) when ADHD is the primary reason they qualify for special education. OHI can cover other health conditions but is used here as a rough proxy for students receiving special education who have ADHD.
